Bond Partners

Michael Brogan & Ansel Parikh helped steer ideas & did a lot of heavy lifting. Noah Knauf, Collin Ebert, Jesse Ellingworth, Everett Randle, Nancy Xiao, Daegwon Chae, Paul Vronsky & Juliet de Baubigny also dug in & were more than on call with help.

Hillhouse Capital

Liang Wu & colleagues' contribution of the China section provides an overview of the world's largest market of Internet users.

Participants in Evolution of Internet Connectivity

From creators to consumers who keep us on our toes 24x7 & the people who directly help us prepare the report. And, Kara & team, thanks for continuing to do what you do so well.

Context...

We use data to tell stories of business-related trends we focus on. We hope others take the ideas, build on them & make them better.

At 3.8B, the number of Internet users comprises more than half the world's population. When markets reach mainstream, new growth is harder to find as evinced by declining new smartphone shipments in 2018. While E-Commerce continues to gain share vs. physical retail, growth rates are slowing. While Internet advertising growth is solid & innovation is healthy, there are areas where customer acquisition costs may be rising to unsustainable levels.

While Internet user growth is slowing, global innovation & competition continue to drive product improvements, new types of usage & monetization – especially in areas of digital video, voice, wearables, on-demand + local services & traditionally underserved markets. Outside of USA, we focus on especially high growth & innovation in data-driven / direct fulfillment & financial services. We highlight massive global usage changes related to the evolution of images & interactive gaming as communications tools & the broad emergence of freemium businesses at scale.

The rapid rise of gathered / analyzed digital data is often core to the holistic success of the fastest growing & most successful companies of our time around the world. Context-rich data can help businesses provide consumers with increasingly personalized products & services that can often be obtained at lower prices & delivered more efficiently. This, in turn, can drive higher customer satisfaction. Better data-driven tools can improve the ability for consumers to communicate directly & indirectly with businesses & regulators.

Core constituents (consumers / businesses / regulators) are increasingly drinking from a data firehose & management challenges continue to rise for all parties. Broad awareness of challenges (& related vigorous / heated debates) can be the first step in driving change.

...Context

Consumers are aware of concerns about Internet usage overload & are taking steps to reduce usage – leading USA-based Internet platforms have rolled out tools to help monitor usage & social media usage growth appears to be decelerating following a period of strong growth. Privacy & problematic content concerns are also top-of-mind & are following similar patterns.

Owing to social media amplification, reveals / actions / reactions about events can occur quickly – resulting in both good & bad outcomes. In markets where online real-time rating systems exist, accountability can be improved vs. offline options as consumers & businesses interact directly while regulators can also benefit.

Rapidly expanding connectivity has helped amplify voices of good & bad actors. This has brought new focus to an age-old challenge for regulators around the world – finding the most effective ways to amplify good & minimize bad, often resulting in different regional interpretations & strategies.

As Internet systems become increasingly sophisticated, data-rich & mission critical, so has the opportunity for cyber attacks. We are in a new era of cyber security where technology issues are increasingly intermixed with international diplomacy & defense.

We focus on the impact of the Internet on work (via on-demand services & remote options), education & healthcare – the materiality of current trends imply inflections are occurring. We update USA trending around government finances & the importance of immigration to the technology sector.

The Hillhouse Capital team provides insights into China – the largest market of Internet users & a leader in innovation / scale.

Effective + Efficient Marketing = Can Be Free Trial / Tier

Online Streaming – Reasons For Trying New Service

Source: 2BrightCove / YouGov survey of 10,502 adults in USA, UK, France, Australia, Germany, Canada & UAE, 9/18.

Happy Customers... Spotify = Free User Conversion to Paid Subscribers...

Free Ad-Supported Product...

Our freemium model accounts for ~60% of our gross added premium subscribers... the ad-supported service is a subsidy program that offsets costs of new subscriber acquisition.

Developing a better user experience produces by far the most viral effect & impact when investing in growth. Engagement drives conversion from free consumption to paid subscription.

Barry McCarthy – CFO, Spotify, 3/18

...Rising LTV / Subscriber Acquisition Cost Ratio

Source: Spotify releases & Morgan Stanley estimates of LTV & SAC. Barry McCarthy @ Spotify Investor Day (3/18). Note: Morgan Stanley estimates LTV by calculating the value of a subscriber (including advertising revenue they generate before they upgrade to a paid user) accounting for gross margin & churn. Subscriber acquisition cost calculated by dividing sales & marketing spend in a relevant period by the number of new subscribers in the same period.

...Happy Customers...

Zoom = Free User Conversion to Paid Subscribers

Free to Join, When Paid User Hosts...

*..we really want to get customers to test our product...
It's really hard to get customers to try Zoom without a freemium product...*

***We make our freemium product work so well...
If they like our product, very soon they are going to pay for the subscription.***

The most important thing is to make sure the existing customer [is] happy rather than chasing after new prospects.

*Our NPS is in the 67-69 range vs. our peers in the 20's...
We do not want to spend money on [the] marketing side to generate leads.*

Eric Yuan – Founder / CEO, Zoom, 8/17

...High LTV / CAC Ratio*

Effective + Efficient Marketing = Can Be Recommendations

E-Commerce – Reasons for Trying New Subscription Box

Source: McKinsey Research on E-Commerce Consumers (2/18). Note: Based on online survey from November 8 to 12, 2017, with responses from more than 5,093 participants in the United States. Of those, 4,057 (80 percent) were online shoppers, defined as people who had spent at least \$25 online in the past month. Of those, 607 (15 percent) had subscribed to at least one service over the past 12 months.

Happy Customers... Stitch Fix = Recommendations Drive Growth

Data-Driven / Personalized Recommendations...

The better way to [sell clothing] is through personalization – get to know product, get to know people & generate really good recommendations...

What's really special about Stitch Fix is that 100% of what we sell is based on recommendations.

We have over 4,000 stylists...what makes them successful is listening, empathy & delivering what the client wants & doing that without judgment...Our business is about helping people feel their best, not necessarily selling the big high-end fashion trends.

Katrina Lake – Founder / CEO, Stitch Fix, 6/18

...Stitch Fix Active Clients

Source: Katrina Lake interview @ JPMorgan Technology, Media & Communications Conference (6/18). Stitch Fix SEC Filings.
Note: Active Client refers to a client who has checked out at least 1 recommended 'Fix' in the past 12 months.

Advertising TBDs

TBD = Impact on Ad Targeting... Privacy Changes

***...privacy [concerns] are a headwind for [Facebook] in 2019.
It's one of the factors that's contributing to our expected
deceleration of revenue growth throughout the year.***

*You've got regulatory – which was GDPR in 2018...
the regulatory arc will be longer-term in playing out...*

*Platforms like iOS are making bigger
pushes in privacy & that has the potential impact...
then changes that we're making ourselves...*

we've elected to rollout GDPR-type controls globally...

*later this year, we'll be launching Clear History,
which will also affect our ability to do third-party targeting.*

David Wehner – CFO, Facebook, 2/19

China (Pinduoduo) = Connecting Consumer Preferences & Manufacturers... 443MM Buyers + ~2x in Five Quarters

Pinduoduo

Group Discovery / Buying

*We call it **consumer-to-manufacturer**, where we understand the users' needs first & enable upstream providers, be it farmers, manufacturers, etc. to produce appropriate products for our users. This is different from how the current system works, where upstream producers design, manufacture & sell without necessarily being in tune with the changing needs of their targeted users.*

As we add more users to the network & also gain more data points through their increasing interaction with our platform, we can further refine our engine to deliver an even better user experience that keeps up with our users' evolving preferences.

Pinduoduo – Q4:18 Earnings Call, 3/19

Active Buyers, China

Source: Pinduoduo SEC filings (2018), Q4:18 Earnings Call (3/19) & Morgan Stanley.
Note: An active buyer is a buyer who has completed at least one transaction in the past 12 months.

China (Meituan Dianping) = Connecting Consumers & Local Businesses... ~6MM Merchants + ~2x in Two Years

Meituan Dianping

Fulfillment

Traditionally, local merchants in China – mostly micro & small businesses – have very few marketing channels available to them. We have become the go-to platform for local search & consumer service discovery.

Based on our data analytics, we leveraged user search queries to connect them with high-quality local merchants who match their preference. We are able to help merchants reach a vast quantity of potential consumers with a low upfront cost & high conversion rates.

Xing Wang – Co-Founder, Chairman & CEO, Meituan Dianping, 3/19

Active Merchants, China

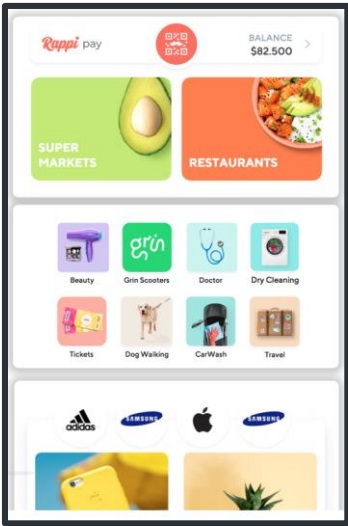

Source: Meituan Dianping Releases (2018-2019) Note: An active merchant is a merchant who has completed at least one transaction, purchased online marketing services, processed a payment through Meituan Dianping's service, or generated an order through Meituan Dianping's ERP system.

Latin America (Rappi) = Digitizing Delivery... 8MM Orders + ~2x in Four Months

Rappi

Digital Delivery Platform

Latin America has a great delivery culture. Cities are chaotic, delivery was super manual & not all stores offered it — there was plenty of inefficiency & high costs.

We thought: what if we digitized this ecosystem & started to deliver anything in under 30 minutes for less than a dollar?

Simon Borrero, Sebastian Meija, Felipe Villanmarin, Andres Bilbao, Guillermo Plaza – Co-Founders, 6/19

Monthly Orders, Latin America

Financial Services
Growing Rapidly*

China (AliPay) = Broad Online / Offline Financial Services... 1B Users + ~2x in Two Years

AliPay

Payments / Financial Services

Alibaba has the most comprehensive ecosystem of commerce platforms, logistics & payment to support the digital transformation of the retail sector.

Ant Financial / AliPay is not only China's #1 mobile payments platform, but it is also a provider of financial services such as loans, wealth management & insurance products to hundreds of millions of consumers & millions of small businesses on the Alibaba platform.

Joe Tsai – Executive Vice Chairman, Alibaba, 2/18

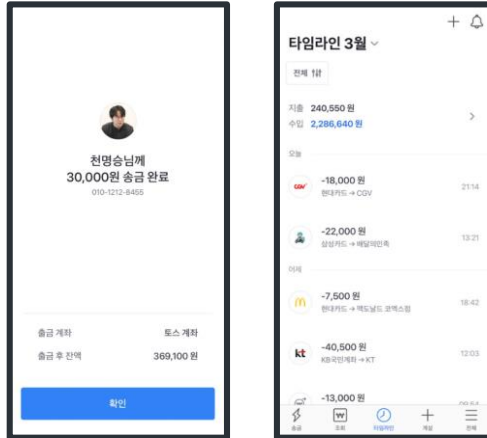

Annual Active Users, Global

South Korea (Toss) = Digital Payments / Financial Services... ~12MM Users + ~2x in One Year

Toss

Payments / Financial Services

A persistent problem in Korea has been the lack of mid-level interest-rate loans.

The reason for this is because there hasn't been adequate credit evaluation on filers with mid-level credit scores or small business owners.

Data from the Toss mobile payment platform & its partners will help make better credit judgments on those filers when they are seeking loans.

SG Lee – Co-Founder & CEO, Toss, 3/19

Users, South Korea

Europe (Revolut) = Personalized Banking... 4MM Users + ~2x in Ten Months

Revolut

Money Transfer / Banking

Personalization with the help of data / technology will allow people to have all their [financial] needs covered & what's more – they will be able to choose all those setting themselves.

We're also heavily investing in data science & engineering to automate, accelerate & increase the quality of these decisions.

Nikolay Storonsky – Co-Founder & CEO, Revolut, 11/18

Users, Global

Brazil (Nubank) = Banking / Consumer Credit... ~9MM Unique Customers + ~2x in One Year

Nubank

Banking / Credit

Nubank is the largest purely digital bank offering financial services for Brazil, including no fee credit cards, savings accounts (NuConta), P2P money transfer, bill payment, debit cards, salary account portability & a rewards program with real-time benefits.

Nubank also offers highly personalized loans at low prices owing to Nubank's data-driven direct customer relationship.

Nubank – 5/19

Total Unique Customers, Brazil

Latin America (MercadoLibre) = E-Commerce-Driven Digital Payments... 389MM Transactions + ~2x in Two Years

MercadoLibre

Marketplace / MercadoPago Payments

We continue to grow strongly & see tremendous potential in MercadoPago. Off-marketplace transactions already surpassed marketplace transactions.

This trend is compounded by our strong offline initiatives: building out our mobile POS network & MercadoPago's wallet-enabled payments services.

Beyond payments, we are also seeing great adoption of our Asset Management & Credits products. These products facilitate access to financial services to millions of Latin Americans who are either unbanked or underbanked.

Pedro Arnt – CFO, MercadoLibre, 5/19

Annual Transactions, Latin America

Source: MercadoLibre (5/19), Goldman Sachs Investment Research.

Southeast Asia (Grab) = Ride Share-Driven Digital Payments... Transaction Value + ~4x in One Year

Grab

GrabPay

Only 27% of adults in Southeast Asia have bank accounts.

Not having a banking history means that a consumer is invisible to traditional financial institutions - no access to capital to grow businesses or pay for houses.

By launching GrabPay on top of Grab's ride-sharing platform, Grab's millions of users have access to financial services that they could not access via traditional banks & lenders.

Reuben Lai – Senior Managing Director, Grab Financial Group, 5/19

Collaborate in Teams

People have always been visual – our brains are wired for images. Writing was a hack, a detour. Pictorial languages are how we all started to communicate – we are coming full circle.

We are reverting to what is most natural.

Instagram has always been a communication platform, not an image sharing tool.

Instagram challenges the notion that beauty comes in a traditional, artsy form...

it's not about beauty, it's about the story you tell.

Instagram's inherent feedback systems help users continuously improve communication skills.

Kevin Systrom – Instagram Co-Founder, 5/19

Picture or 1,000 Words?

Mallard Duckling making a running leap into the water from the rock ledge at Argyle Lake, Babylon, Long Island. Mallard ducks are the most common & recognizable wild ducks in the Northern Hemisphere. They spend most of their time near natural bodies of water (ponds, marshes, streams, & lakes) where they feed on plants, invertebrates, fish, and insects. Mallards are dabbling, or surface-feeding, ducks because they eat by tipping underwater for food—head down, feet and tail in the air—rather than diving. Mallards also forage and graze for food on land. The male mallard duck, called a drake, sports a glossy green head, a white ring around its neck and a rich, chestnut-brown breast. The mallard duck's outer feathers are waterproof, because of an oil that's secreted from a gland near the tail. Soon after birth, baby ducks, called ducklings, open their eyes. A little more than a day after hatching, ducklings can run, swim, and forage for food on their own. They stay in the nest for less than a month. A group of ducklings is called a brood. Outside the nest, the brood sticks close by the mother for safety, often following behind her in a neat, single-file line. Freemium Gaming (2001) = Runescape...

Free

Play With Others...

I launched [Runescape] in 2001.

The basic plan was to run it for free, but to pay for my hobby through advertising. However, when the dot com bubble began to collapse, advertising dried up & there was no way to pay for the game's server.

This is how the member [subscription] came about... once we had people paying, we were able to reinvest back into the game.

The more we invested, the faster it grew.

Note: Users refer to monthly active users. Total Users refers to active users (free + paid) in relevant period.

...Freemium Gaming (2017) = Epic Fortnite

Free

Play With Others...

I think it's a very positive trend that people are spending time in social experiences. That's the thing you have to appreciate with Fortnite. Most people are playing together in squads with their friends, they're on voice chat.

They're playing a video game, but what they're really doing is spending time with their friends & chatting all night.

It can last as long as the developers can keep games fresh & fun – we're at that point where we're able to do it & there's a business model with free-to-play.

Qualtrics + FabFitFun = Collect Data to... Understand Customer Wants & Improve Business Processes

Qualtrics = Experience Management

Every organization in the world needs to collect experience data to close the massive gaps between the experiences they think they are delivering & what is really happening, both internally & externally.

Collecting experience data through Qualtrics allows companies to make adjustments in real time & adapt to fast-paced, changing circumstances. This allows those companies to quickly close experience gaps with their customers & enables employees to work more efficiently to serve those customers.

Ryan Smith – Qualtrics, Co-Founder, 6/19

Qualtrics Revenue

FabFitFun = Community Input

We're constantly tapping our members for real-time feedback to better understand the products & trends they like, the ingredients & formulations that get them excited, & the categories that connect them back to the FabFitFun brand & community.

We've aggregated millions of data points about consumer product & brand preferences allowing us to precisely forecast satisfaction with personalized curations & enable a flywheel between deeper understanding & an improved member experience.

Daniel Broukhim – FabFitFun, Co-Founder / Co-CEO, 6/19

FabFitFun Subscribers

Source: Qualtrics S-1 Filing (10/18). Morgan Stanley Estimate of 2018 Revenue (as part of SAP). FabFitFun (6/19)

Salesforce + Adidas = Collect Data to... Increase Customer Input / Improve Products

Salesforce = Customer Engagement

...as every company transforms their relationships with their customers...they're fundamentally changing how they sell & how they service, how they market & innovate.

They're connecting with their customers in a whole new way. They're building incredible new intelligent 360-degree views of their customers, & they're using extraordinary new tools to get faster, more informed decisions & at the heart of all this transformation is Salesforce.

Marc Benioff – Salesforce, Co-Founder / Co-CEO, 8/18

Salesforce Annual Revenue

Adidas = Customer Co-Creation

We need to be able to respond to consumer expectations immediately. **The relationship between Adidas & Salesforce allows us to be proactive in our designs** – our ability to roll out new products & influence trends is amazing...

Our direct connection with customers through Salesforce basically makes it happen overnight.

Kasper Rorsted – Adidas, CEO, 6/18

Adidas E-Commerce Sales

Stripe + Slack = Collect Data to... Manage Direct Customer / Subscriber Relationships

Stripe = Transaction Management

...the most innovative companies are establishing recurring relationships with their customers. As these businesses iterate to find the best pricing & sales strategy, they're often unnecessarily constrained by what their billing system allows.

[Customers] needed to do more than just simple subscription management. Based on feedback from many of our customers & others, we built Stripe Billing to provide fast-growing businesses the tools to move quickly & design billing around customer experience.

Noah Pepper – Stripe, Engineering & Product Management, 4/18

Stripe Stripe Billing

Slack = Effective Billing of Users

Slack recently launched Fair Billing Policy & it makes our customers say 'Wow, that's amazing.'

They'll tweet about it, tell their friends about it. They'll be very happy with us. They'll be much more likely to renew. They have a positive impression.

That positive impression, obviously, makes a huge difference.

Stewart Butterfield – Founder / CEO, Slack, 7/15

Slack Paying Share of Total Users

Source: Stripe blog post (4/18), Stripe (6/19), Slack public disclosures (2015-2018), Stewart Butterfield Interview with SaaStr (7/15).

Plaid + Betterment = Collect Data to... Improve Consumer Decision Making

Plaid = Financial Data Access

In the past, financial services were organized geographically – a bank would serve a local population & offer whatever services it thought that area needed – which often meant many consumers were underserved. Today, a new class of user-centric financial services companies are emerging that use data to tailor their services to the specific needs of individual consumers.

Our goal at Plaid is to build the infrastructure that enables consumers to easily & securely share their financial data with any financial services app that helps them live healthier financial lives.

Zach Perret – Plaid, Co-Founder / CEO, 6/19

Betterment = Automated Financial Management

Emotions drive human behavior, especially when it comes to money – people often engage in sub-optimal behaviors like trying to time the market.

Delivering high quality automated financial advice in real-time at scale requires access to consumers' financial data. We're able to use data from Plaid and other sources to deliver personalized, low-cost financial advice to more than 450,000 customers.

Jon Stein – Betterment, CEO, 6/19

Slack + HelloFresh = Manage Connections to... Organize Internal + External Communication

Slack = Communication Channels

What Google is doing for the web, we're trying to structure by channel.

Team-first, organization-first approach to messages as opposed to individual first.

As individual productivity increases, it's the handoff between people that gets more complicated. The talking to other people is the actual work.

Stewart Butterfield – Slack, Founder / CEO, 5/18

HelloFresh = Feedback Mentoring

HelloFresh uses Slack bots to monitor social media.

Whenever someone mentions HelloFresh, the bot pushes these notices into a Slack channel. They're similarly alerted whenever they get a review of their app on the Apple Store or Google Play.

HelloFresh – 9/17

Twilio + Shopify = Manage Connections to... Communicate with Customers via Multiple Channels

Twilio = Customer Communication

15 years ago, talking to customers meant you had a phone number & customers could call it. Now, you've got text messaging, chat, mobile apps with push notifications, WeChat, WhatsApp, Facebook Messenger.

We want to provide one system that allows companies to keep up with this rapidly changing landscape & constantly iterating on those customer experiences with easy to use tools & infrastructure that they don't have to worry about scaling.

Jeff Lawson – Twilio, Founder / CEO. 11/17

Twilio Customers

Shopify = Multi-Channel Dialog

We want to create an easy experience for our customers...we want to establish trust & form a human relationship with our customers [merchants] when they reach out for support on our platform.

It is essential to give our team the tools to cultivate those relationships from anywhere in the world on the channels that our customers want to use.

Chris Wilson – Shopify, Merchant Operations, 11/18

Shopify Active Merchants

Segment + Meredith = Manage Connections to... Organize Customer Data Across IT Systems

Segment = Customer Data Infrastructure

Today's customers expect highly relevant, contextualized experiences wherever they interact with a business. However, this is an extremely difficult technology problem to solve.

Businesses are interacting with customers across dozens of digital channels, leading to a tangled mess of data that is siloed throughout their organization.

Customer Data Infrastructure solves this problem. It allows companies to collect, manage & easily route their first-party data to whichever application requires it, ensuring customer experiences are consistent and relevant.

Peter Reinhardt – Segment, Co-Founder / CEO, 6/19

Segment Annual Recurring Revenue

Meredith = Content Recommendation

Segment has enabled us to streamline the customer data capture process, while maintaining flexibility to customize for each of our 36+ magazine brands as needed.

Before adopting Segment, we were spending far too much money on disjointed analytics & we had no way to look at the entire network at scale...

We now look across the entire organization to make sure we're best serving all of these groups.

Grace Preyapongpisan & Kerry-Anne Doyle –
Meredith, Business Intelligence, 1/18

Meredith Digital Advertising Share of Total

Source: Segment, Peter Reinhardt Blog Post (9/18). Segment Release (2018) Meredith Annual Reports (2012-2018). Note: Meredith digital advertising reflects National Media segment.

Snowflake + Instacart = Optimize Data to... Improve Analytics / Recommendations / Personalization

Snowflake = Broad Data Access

There's a lot of value in business data, but most companies struggle to extract that value.

The issue is with existing technology. The list of challenges we hear from our customers is consistent:

Data is segregated into separate silos, significant energy goes into managing infrastructure, concurrency & resource limitations get in the way of business needs & overall the tools are hard to work with.

Snowflake's unique architecture solves these problems being built from the ground up to leverage the scale, performance & elasticity of the cloud.

Frank Sliotman – Snowflake, CEO, 6/19

Snowflake Monthly Active Customers

Instacart = Product Replacements

Every time an Instacart shopper scans an item into their cart or marks an item as "not found," we get information that helps us make granular predictions of an item's in-store availability. This helps us recommend appropriate replacements for items likely to be out-of-stock.

Among other improvements, performing complicated feature engineering in our Snowflake data warehouse instead of python, this new [item replacement] tool, which scores 15x more items than previous tools, was built with 1/5 of the resources in 1/4 of the time.

Instacart – 12/18

Instacart Households Covered

Confluent + Accor = Optimize Data to... Respond to Customer Events at Scale

Confluent = Data / Event / Response

Companies are still running on tech from batch-process era, yet their **customers expect experiences with real-time, contextual information.**

Companies are now re-architecting their businesses around real-time data with a new kind of data infrastructure called event streaming platforms.

With Confluent, companies can connect all of their systems & power applications with live data sources. **Now, they can engage their customers based on real-time events.**

Jay Kreps – Confluent, CEO, 6/19

Confluent Annual Bookings

Accor = Availability Request Processing

Accor's augmented hospitality offerings include 4,800 hotels, resorts, & residences across 100 countries.

As part of a shift to a more connected, real-time future, Confluent is helping simplify & transform the booking lifecycle, connecting the data & event streams that are triggered the second a customer clicks 'book,' from processing the payment & fraud detection to adding dietary requirements & room preferences from previous bookings.

Julien Ramakichenin – VP Distributed & Intelligent Systems, Accor, 6/19

Accor

Monthly Requests for Lodging Availability

Looker + FarFetch = Optimize Data to... Discover Business Insights + Optimize Fulfillment

Looker = Business Intelligence

Looker helps companies better understand all the data they have & I think this has been a holy grail for a long time.

Companies want to be data-driven. They want their employees to be able to ask questions & get factual answers.

When we started out, companies didn't understand the lifetime value of their customers completely, & there was this chaos going – we wanted to bring data into the reach of any company so it could use it more effectively.

Frank Bien – Looker, President & CEO, 8/18

Looker Customers

FarFetch = Optimize Order Fulfillment

In luxury fashion, there is often a mismatch between supply & demand...Emerging brands typically have no route to the global market & their distribution is limited.

Farfetch has more supply / demand data than anyone else in the luxury fashion industry & is now supplementing it with even more market data.

Over time, Farfetch will turn that data into strategic commercial insights to form the basis of advisory for the fashion industry (starting with the luxury brands) through the development of a disruptive insights platform.

Farfetch – 3/19

UiPath + Sumitomo Mitsui = Optimize Data to... Manage Data Growth & Eliminate Inefficiencies

UiPath = Data-Driven Process Automation

UiPath Computer
Vision Training

...[Robotic Process Automation's (RPA)] benefits compound as employees are freed from the burden of routine, monotonous manual work, enabling them to focus on high-value tasks such as improving customer service, enabling front-line staff to retrieve more data at a faster rate & enhancing every aspect, from the booking experience to customer service support.

This leads to greater employee satisfaction & more productive staff who deliver better customer service experience & positive feedback from customers.

Daniel Dines – UiPath, Founder / CEO, 4/18

Sumitomo Mitsui = Increase Support Capacity

Progress of key initiatives	Target	Actualization
Business reform to improve efficiency	JPY 20bn	JPY 13 bn
<ul style="list-style-type: none"> Automated approx. 1.1 million hours (workload of 550 people) of operation by utilizing RPA on a group-wide basis Three-year plan: 3 million hours (workload of 1,000 people) 		
<ul style="list-style-type: none"> The integration and sharing of functions on a group-wide basis are generally progressing as planned. 		
Retail branch reorganization	JPY 20bn	JPY 8 bn
<ul style="list-style-type: none"> Completed transformation of 153 branches to next-generation branches as well as centralization of back-office operations of 134 branches 		

Our key areas of RPA implementation include – information gathering processes used to enhance sales & planning capabilities (customer transaction / industry data) & supporting branch operations (customer performance reports / mortgage loan brochures).

The anticipated 3MM person-hours of productivity to be generated over the next 3 years [by using RPA] will be used to expand value-add operations, like enhancement of sales capacity through improved customer proposals.

Data Stewardship = Evolving... Enterprise Surpassed Consumer...Cloud Overtaking Both

Data Stored by Manager, per IDC

Data Volume Share = EMEA Leads... Followed by Fast Rising China...USA Falling

New Data Captured / Created / Replicated by Region, per IDC

Source: IDC 'Digitization of the World From Edge to Core White Paper' developed in collaboration with Seagate (11/18), IDC DataSphere. IDC estimates that China's Data captured / created / replicated will grow 30% annually for next 7 years owing to more Internet users creating more data in China & China's above average usage of video surveillance – video is by far the most data-intensive type of data commonly captured / created / replicated today. EMEA's datasphere is the largest in the world today owing, in part, to their mature use of video surveillance technology. Note: EMEA = Europe, Middle East & Africa. ROW = Rest of World. Note: 2018 = last full year before release of report. 2019-2025 are estimated from current trends.

The data-driven world will be always on, always tracking, always monitoring, always listening & always watching – because it will be always learning.

What we perceive to be randomness will be bounded into patterns of normality by sophisticated artificial intelligence algorithms that will deliver the future in new & personalized ways.

Artificial intelligence will drive even more automation into businesses & feed processes & engagements that will deliver new levels of efficiency & products that are tailored to business outcomes & individual customer preferences.

Today, companies are leveraging data to improve customer experiences, open new markets, make employees & processes more productive & create new sources of competitive advantage...

Traditional paradigms will be redefined (like vehicle or white goods ownership) & ethical, moral & societal norms will be challenged...

David Reinsel / John Gantz / John Rydning – IDC, *The Digitization of the World – From Edge to Core*, 11/18

Data Volume + Utilization... Technology Change > Human Adaptability

Humans' ability to adapt to technological change is increasing, but it is not keeping pace with the speed of scientific & technological innovation.

To overcome the resulting friction, humans can adapt by developing skills that enable faster learning & quicker iteration & experimentation.

Developing these skills is particularly important for policy makers & regulators who are looking to protect the public interest. They need to be ready to try new approaches, iterate & change with the times so tech progress goes hand in hand with public benefit.

16% = Physical Threats

Pew Survey (USA Teens)

Motivated Bad Actors = Can Amplify Ideologies

The main terrorist problem in the United States today is one of individuals radicalized by a diverse array of ideologies absorbed from the Internet.

Peter Bergen & David Sterman – *The Real Terrorist Threat in America* - *Foreign Affairs*, 10/18

Unintended Bad Actors = Can Amplify Misinformation

The Internet plays a role in fostering distinct & polarized online communities among conspiracy theory believers...

Believers share their opinions & 'evidence' with other believers but are less willing to share with people who are critical of conspiracy theories –

with the Internet, conspiracy groups become more homogeneous & their beliefs become stronger over time.

Karen Douglas – Professor of Social Psychology, The University of Kent Writing for The Conversation, 6/18

Extreme Views = Can Amplify Polarization

Polarization has been abetted by many factors. Americans are sorting themselves out geographically, living in increasingly politically homogeneous neighborhoods.

Social media & the proliferation of media channels via the Internet & TV has played a role, allowing people to communicate exclusively with people like themselves.

Identity & the growth of identity politics have also played a role – People have gravitated toward groups that feel they are in a zero-sum competition against one another.

Francis Fukuyama – Stanford University, Professor of Political Science, 12/18

mobile networks often for political reasons

Internet Population 'Internet Freedom Status'

Source: Freedom on The Net Reports 2016 + 2018. Note: Freedom on the Net measures the level of Internet & digital media freedom in 65 countries. Each country receives a numerical score from 0 (the most free) to 100 (the least free), which serves as the basis for an Internet freedom status designation of FREE (0-30 points), PARTLY FREE (31-60 points), or NOT FREE (61-100 points). Ratings are determined through an examination of three broad categories – Access (Assesses infrastructural & economic barriers to access). Content Limits (Examines filtering & blocking of websites) & User Rights (Measures legal protections & restrictions on online activity; surveillance; privacy; & repercussions for online activity, such as legal prosecution, imprisonment, physical attacks, or other forms of harassment). Scores do not add to 100 owing to non-analyzed countries.

Global Internet Freedom Framework (Freedom House)

Freedom House *Freedom on The Net Index*

Measures a country's level of Internet / digital media freedom, using questions derived from Article 19 of UN's Universal Declaration of Human Rights:

Everyone has the right to freedom of opinion & expression; this right includes freedom to hold opinions without interference & to seek, receive & impart information & ideas through any media regardless of frontiers.

Countries are given points for: 1) Obstacles to Access; 2) Limits on Content; 3) Violations of User Rights

Free

Countries with low economic / infrastructural / regulatory barriers to Internet access...
minimal blocking / filtering of content / information...strong privacy protections

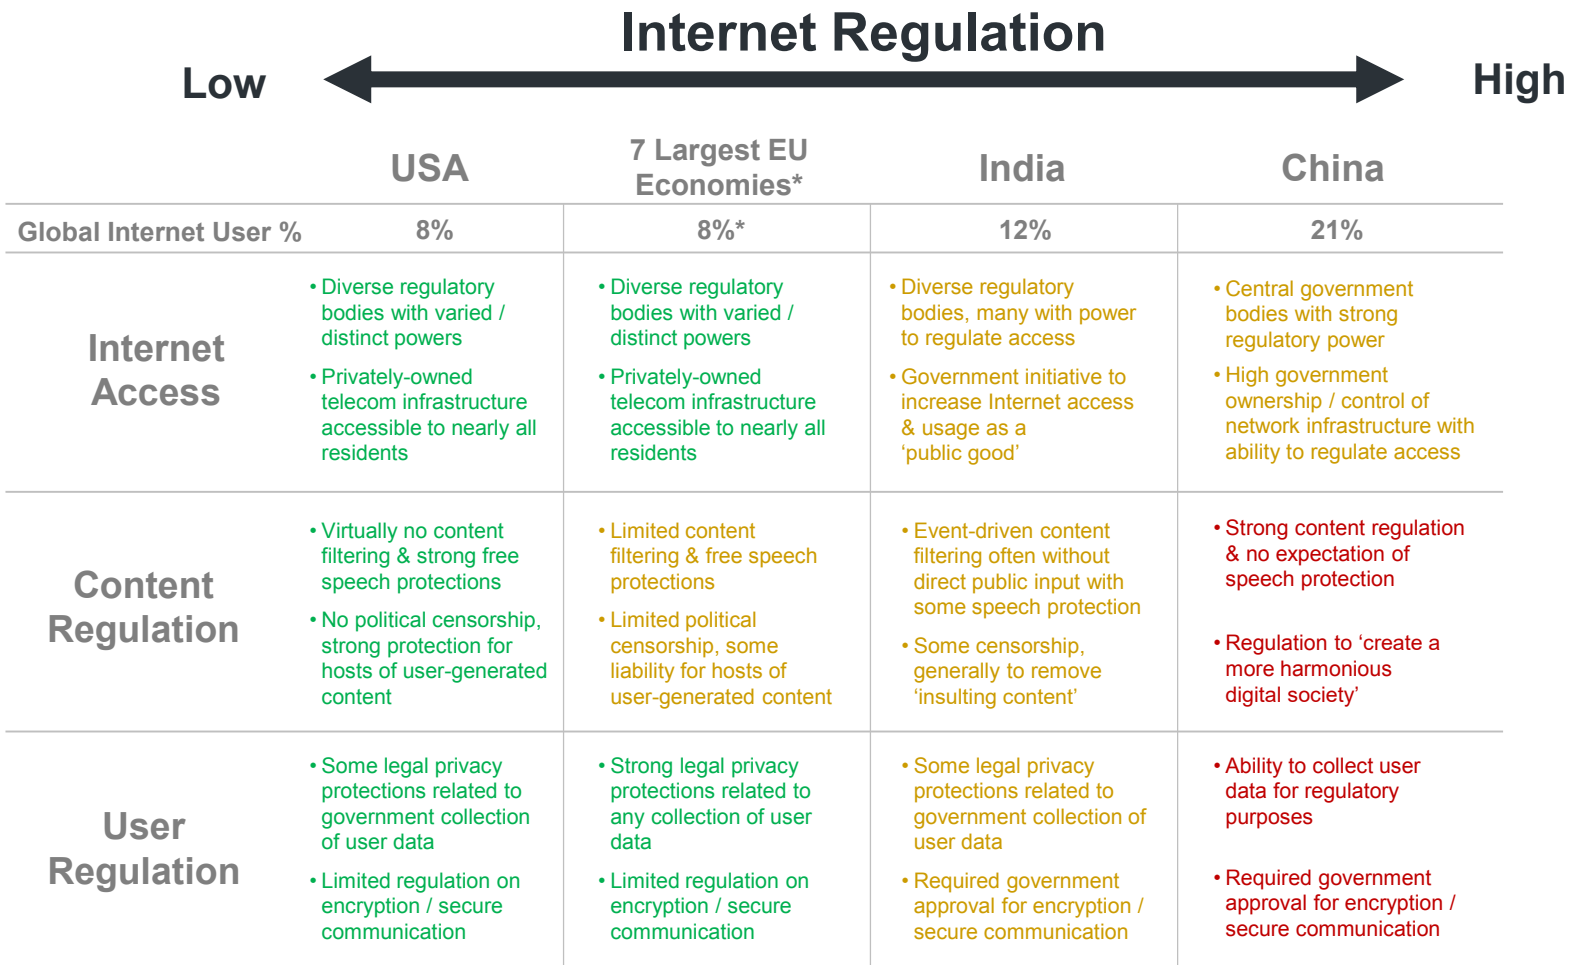

Partly-Free

Countries with some barriers to Internet access (like state-owned providers handicapping competition)...
some blocking of content / information (like news sites or temporary blocks on social media)...
some privacy violations (like data collection requirements with weak judicial oversight)

Not-Free

Countries with strong barriers to Internet access (like cutting off the internet to certain regions)
...strong blocking of content (news sites, opposition figures, permanent blocks on social media)...
rampant privacy violations (like data localization requirements with low judicial independence, unchecked surveillance)

World Wide Web = Webs of Worlds Driven by Local Regulation...

Legend

Limited Regulation
 Moderate Regulation
 Strong Regulation

Note: *Based on analysis of Germany / UK / France / Italy / Spain / The Netherlands / Sweden – 7 largest economies in The European Union, representing >70% of The EU GDP in 2018 & a majority of votes in the EU Parliament. ...Individual policies vary across The EU, in particular, some eastern European Union countries (e.g., Hungary) significantly limit Internet freedom in stark contrast to more open EU nations. Analysis also takes into account EU-wide directives, such as GDPR. Source: Adapted from Freedom House 2018 Freedom on the Net Report. Global Internet User % as of 2018 per CIA World Factbook, United Nations / International Telecommunications Union, USA Census Bureau. Internet user data is as of mid-year. Internet user data: Pew Research (USA), China Internet Network Information Center (China), estimates based on IAMAI data (India).

...World Wide Web = Webs of Worlds Driven by Local Regulation

Global Internet Regulatory Observations per *Foreign Affairs* (9/18)

USA

In 1997, USA negotiated an agreement through the World Trade Organization that committed 67 signatory countries to 'procompetitive regulatory telecommunications principles'...

As the Internet grew more centralized & as its role expanded, policymakers failed to keep up. When it came to updating regulations for online activities...the Internet was treated as a special realm that did not need regulation & the bad guys took notice.

Karen Kornbluh – Senior Fellow for Digital Policy, Council on Foreign Relations

European Union

The GDPR has...created a blueprint that other states & organizations will study closely as they, too, seek to properly balance individuals' rights to data protection with their other rights & with the legitimate interests of business & government.

The law's main innovation is to establish a bedrock principle of accountability. It places responsibility for properly collecting & processing personal data squarely on organizations & extends to individuals the right to prevent their data from being collected or processed. The GDPR also gives individuals the right to insist that their data be deleted.

Helen Dixon – Data Protection Commissioner, Ireland

India

When a service provider sends an authentication request to Aadhaar (India's National Identity System), the purpose of the authentication is not revealed; all the government knows is when someone uses his Aadhaar number, not where or why.

[Aadhaar shows] India's approach to the Internet is simple – empower users with the technical & legal tools required to take back control of their data.

Nandan Nilekani – Founding Chair of Unique Identification Authority of India

China

Chinese leaders want to ensure a harmonious Internet – one that guides public opinion, supports good governance & fosters economic growth but also is tightly controlled...

China has promoted 'cyber-sovereignty' as an organizing principle of Internet governance...China envisions a world of national Internets, with government control justified by the sovereign rights of states.

Adam Segal – Chair, Emerging Technologies & National Security, Council on Foreign Relations

***Open Internet =
Can Benefit All Constituents***

Pew Survey (USA)

*Open Internet =
Can Be Messy, But Effective...*

*Consumer / Business / Regulators =
Key to Work Together to
Amplify Good + Minimize Bad*

*During the first two-decades of the Internet's growth,
too much faith was put in the technology itself.*

*Not enough was done to address challenges
such as the spread of surveillance technologies,
abuse of online platforms & the general undermining of trust.*

***...[governments] should work to establish better baselines &
metrics to assess the Internet's true impact, as well as the
kinds of actions that enable the good & mitigate the bad.***

***Advocates for the open Internet should acknowledge that regulation
can help, while remaining vigilant to unintended consequences.***

*...all of these stakeholders should continue to forge coalitions
that work across borders in support of flexible, focused &
rights-compliant efforts to improve freedom online.*

Jason Pielemeier – Policy Director, The Global Network Initiative, *Council on Foreign Relations Blog*, 7/18

First Step in Long Journey = An Algorithmic Bill of Rights?

Crowdsourced Algorithmic Bill of Rights, per Sigal Samuel @ Vox

- 1) Transparency
- 2) Explanation
- 3) Consent
- 4) Freedom from Bias
- 5) Feedback Mechanisms
- 6) Data Portability
- 7) Redress
- 8) Algorithmic Literacy
- 9) Independent Oversight
- 10) Federal / Global Governance

***Highly Regulated Internet =
Can Favor State Control***

A fundamental First Amendment principle is that all persons have access to places where they can speak & listen & then, after reflection, speak & listen once more.

Today, one of the most important places to exchange views is cyberspace, particularly social media, which offers relatively unlimited, low-cost capacity for communication of all kinds.

Anthony Kennedy – Former USA Supreme Court Justice – Majority Opinion, *Packingham v. North Carolina*, 6/2017

If there be time to expose through discussion the falsehood & fallacies, to avert the evil by the processes of education, the remedy to be applied is more speech, not enforced silence.

Louis Brandeis – Former USA Supreme Court Justice – Concurring Opinion, *Whitney v. California*, 5/1927

I urge improving the governance capacity in cyberspace & developing a governing network led by the [Communist Party of China].

Internet media should spread positive information, uphold the correct political direction & guide public opinion & values towards the right direction.

Internet service providers should take responsibility to prevent cyberspace from degrading into a platform full of harmful, false & provocative information.

Xi Jinping – President of The People's Republic of China, As Translated by Xinhua, 4/2018

***Cyber Attacks =
Sophistication + Scope Continue to Rise***

Cyber Attacks = Evolving Sponsors / Targets / Asks / Detection

1) **State-Sponsored Actor Attacks = Rising**

USA / UK / The Netherlands / Germany Have Publicly Indicted State-Actors

2) **Large-Scale Data Provider Attacks = Rising**

Cloud Providers / Telecoms / Data Brokers Seeing Elevated Attack Activity

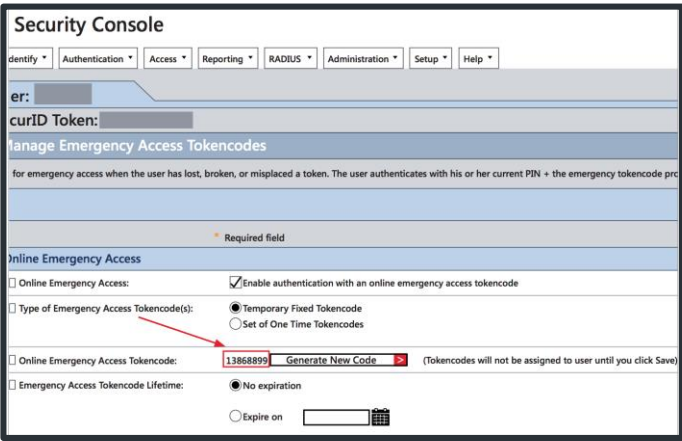

3) **Monetary Extortion Cases = Rising**

Non-Attributable Currencies (e.g., Crypto) Enabling Anonymous Ransom Payments

4) **Attack-to-Detection Dwell Time = Continues To Fall**

Average Days = 78 (2018)...101 (2017)...416 (2011)

Cyber Attacks = Opportunities Created by Online System Weaknesses

A financial services firm engaged a Mandiant Red Team to evaluate the effectiveness of its information security team’s detection, prevention & response capabilities. The team was able to obtain full administrative control of the company domain & compromise all critical business applications without any software or operating system exploits.

Instead, the team focused on identifying system misconfigurations, conducting social engineering attacks & using the client’s internal tools & documentation.

FireEye Threat Research, 4/19

Data Center Operators – Downtime Experienced in Past Year

per Uptime Institute

2-Factor Authentication = Incomplete Adoption Limits Effectiveness

Security experts have seen a significant uptick in the number of clients securing their VPN or remote access infrastructure with multi-factor authentication.

However, there is frequently a lack of multi-factor authentication for applications being accessed from within the internal corporate network.

FireEye Threat Research, 4/19

% Sites Supporting 2-Factor Authentication, Global*

Cyber Attacks = Increasingly Focused on Sensitive Data

As more & more customers move to software as a service & cloud, attackers are following data.

Attacks against cloud providers, telecoms & other organizations with access to large amounts of data... increased in 2018.

FireEye M-Trends Report 2018

Sensitive Records Exposed in Security Breaches

Cyber Attacks = Effects Amplified by State Sponsorship

States are using the tools of cyberwarfare to undermine the very foundation of the Internet: trust. They are hacking into banks, meddling in elections, stealing intellectual property & bringing private companies to a standstill.

The result is that an arena that the world relies on for economic & informational exchange has turned into an active battlefield.

Cyber-operations are emblematic of a new style of competition...

In operation after operation, many of them hardly registered by the wider world, states are weaponizing the Internet.

All these incidents occurred in a gray zone of conflict – below the threshold of outright war but above that of purely peacetime behavior.

Michèle Flournoy & Michael Sulmeyer – Co-Founders, WestExec Advisors, *Foreign Affairs*, 9/18

Source: Ipsos Survey Data of ~20K global respondents. Ipsos conducts this survey on a monthly basis, asking the same questions of a statistically representative sample of >1K people in USA. Note: Percentages do not add to 100% because respondents were allowed to pick 3 choices.

Consumer Confidence Index (USA) = High & Rising... @ 97 vs. 88 Sixty-Five Year Average

Consumer Confidence Index (CCI)

Source: St. Louis Federal Reserve FRED Database. Note: Indexed to Q1:66 = 100. Consumer Confidence Index (Michigan Consumer Sentiment Index) is a broad measure of American consumer sentiment, as measured through a 50-question telephone survey of at least 500 USA residents each month.

Economy / Employment (USA) = Unemployment @ 19 Year Low... Job Openings @ All-Time High...Wages Rising

Real GDP vs. Unemployment Rate, USA

Job Openings, USA

Median Real Weekly Earnings, All Workers Over 16, USA

Source: St. Louis Federal Reserve FRED Database, Bureau of Economic Analysis, BLS. Note: Real GDP based on chained 2012 dollars. Unemployment rate = annual average. *A job opening is defined as a non-farm specific position of employment to be filled at an establishment. Conditions include the following: there is work available for that position, the job could start within 30 days & the employer is actively recruiting for the position. Wages refers to usual weekly earnings of wage & salary workers. Usual weekly earnings represent earnings before taxes & other deductions & include any overtime pay, commissions, or tips usually received (at the main job in the case of multiple jobholders). Usual definition per discretion of interviewee.

Small Business Enabling Payment Processors = Strong Growth

Square Gross Payment Volume, Global

Stripe Connect – Marketplace Volume Impact*
Per Forrester

Source: Square SEC filings. Forrester Total Economic Impact Survey on Stripe Connect (Stripe's Marketplace Product) (7/18). Note: A Total Economic Impact Study is a framework to identify the cost, benefit, flexibility & risk factors for an investment decision. Forrester took a multistep approach to evaluate the impact that Stripe Connect can have on an organization, including stakeholder interviews, customer interviews, the development of a composite organization based on the characteristics of interviewed Stripe customers & a financial model that incorporates the effects / risks of Stripe Connect, as identified by Stripe's customers. Based on interview feedback, Forrester determined that a composite organizations would likely have \$475MM in annual transaction volume prior to using Stripe Connect & that Stripe Connect's features (e.g., improved seller settlement) would result in increased volume of \$47.7MM in Year 1, \$66.1MM in Year 2 & \$90.6MM in Year 3.

On-Demand Services = Growing Rapidly...Benefitting Local Merchants

~5% of [USA] restaurant business's \$800B in annual sales is delivered – we're still in the very early innings of the development of on-demand delivery & services.

We started DoorDash to help local businesses... 'local' has long been the promise of E-Commerce but no one has found a way to help local merchants thrive online – that is the space we focus on.

We do this by enabling local merchants to participate in selling convenience. There are a lot of merchants who are ready to make the transition from selling experiences to also selling convenience, which can often reduce their costs. I think this is the biggest business model change in commerce.

Tony Xu – Founder / CEO, DoorDash, 6/19

On-Demand Consumers = 56MM + ~2x in Two Years

On-Demand Consumers, USA

On-Demand Products / Services – Consumer Spend, 2017, USA

Source: National Technology Readiness Survey (4/18). Note: authored by Rockbridge Associates, Inc. & A. Parasuraman & is co-sponsored by the Center for Excellence in Service, Robert H. Smith School of Business, University of Maryland. The study is conducted online among a representative sample of consumers in a national panel & represents the views of U.S. adults ages 18 & older. The sample size was 1,032 in 2016 & 1,004 in 2017. The margin of error is +/- 3 percentage points. 2018 figures are estimates.

On-Demand Workers =
~7MM +22% Y/Y

On-Demand Platform Workers, USA

Source: Emergent Research (2015-2018) + Intuit (2017). Note: On-demand workers defined as online marketplace workers including transportation and/or logistics for people or products, online talent marketplaces, renting out space. Providing other miscellaneous consumer & business services (e.g. TaskRabbit, Gigwalk, Wonolo, etc.). Workers defined as 'active' employees that have done 'significant' on-demand work within the preceding 6 months.

On-Demand Workers = >20MM Applicants on Checkr Platform Since 2015, USA

As the on-demand economy continues to evolve & transform the world around us, we're seeing a rapid increase in new & supplemental job creation.

Increasingly, this type of work has become a key driver of economic growth.

Checkr has a front row seat in the on-demand economy, not only to watch the changes unfold, but also to provide solutions that shape & strengthen it. Our technology is designed to give employers the information they need to make informed decisions about their candidates, while helping them scale & grow their business.

Online Education (Post-Graduation Income Sharing) = Lambda School

Lambda School – Post-Secondary (Global)

Income Share Agreements

The traditional higher education model downloads the financial risks to the students. Universities aren't incentivized to help students succeed because tuition is paid up front. Not at Lambda School.

We only succeed when our students do – with our ISA model, students pay no tuition until they have landed a job earning \$50K or more. By aligning the incentives of Lambda School with those of the student, we eliminate the financial risk. Ultimately, we help people with raw talent refine their skills & match them with great, high-paying careers they love.

Austen Allred – Co-Founder & CEO, Lambda School, 6/19

Arizona State University

Online Education Programs / Tool

The key to lowering cost is the introduction of technology & new methods that help student success.

The key to stimulating [this] innovation is to change the focus of the culture at a university from the faculty to the students. If you change the focus from faculty-centric to student-centric, you realize you need more tools to achieve certain objectives.

At Arizona State, we need tools for active learning, adaptive learning (advising tools, artificial intelligence-based simulation tools & gaming tools) all in addition to the faculty & advisors that we have. Innovation is absolutely essential when you start thinking about the success of every student.

Michael Crow – President, Arizona State University, 6/16

Source: Kaiser Family Foundation analysis of Census Bureau's American Community Survey (2008-2017). Note: Government = Those covered by Medicare, Medicaid, or Military / Veteran Coverage. Employer = those covered through a current or former employer or union. Out of Pocket = Those covered by a policy purchased directly from an insurance company, either as policyholder or as dependent.

Healthcare Preventable Deaths / Efficiency = USA Worse vs. Peers

Preventable Deaths per 100K People

Administrative Healthcare Spend % Total, 2016

Source: Commonwealth Fund Analysis (2017). Preventable deaths defined as deaths due to illnesses that are considered non-fatal with timely formal healthcare treatment, such as hepatitis, renal failure, thyroid disorder & other chronic illnesses. Administrative spend defined as non-care giving roles, such as billings & collections.

Healthcare = Steadily Digitizing...Driven by Consumers

Consumer Adoption of Digital Health Tools, USA

*Healthcare (USA) =
Strong Digital Usage / Adoption*

Data Pools = Unlocking Deeper Research Insights

Internet Research = Increasing Access to Data / Decision-Making Tools

Patient engagement in decision-making has been associated with increased patient satisfaction & improved health outcomes

The study analyzed cross-sectional data from 1,945 participants of the [USA] National Health & Aging Trends Study

*Internet use was found to be associated with active decision-making preference in older adults. Similarly, **health-related Internet use was positively associated with decision-making involvement in older adults.***

Cajita, Whitehouse, et al.

Association Between Internet Use & Decision-Making Preference in Older Adults (2/17)

Genomic Testing = Growing Base of Personal Genetic Data

Electronic Health Records (EHR) = Organizing Patient Data

...EHR Usage = Still Early Innings

Top Physician 'Wants' for Future EHR Development, per Stanford / Harris Poll, 9/18

EHR Adoption = Nearing 100%...

EHR Adoption, USA

Health Networks = Aligning Provider Teams Across Organizations

Aligned Care Teams = Improving Outcomes @ Lower Cost

We strive to empower a distributed care team to act with aligned purpose, aware of what each individual member is doing – even if representing differing organizations – all united by their shared stewardship for the patient.

You can either throw a tremendous number of expensive, scarce bodies at the problem – which isn't scalable – or you can use technology. I'm not talking about mere notifications that an encounter has occurred, which we also do, but a deeper level of collaboration.

Chris Klomp – CEO, Collective Medical, 6/19

Collective Medical = Real-Time Collaborative Health Network

Online Discovery = Improving Accessibility + Availability of Care

Optimizing Perishable Inventory = Accelerating Access to Care

Healthcare providers partner with Zocdoc to fill their 20-30% unused, perishable inventory.

This dramatically accelerates access to care for patients.

While patients who call wait an average of 24 days to get in to see a doctor, when booking online via Zocdoc, the typical appointment happens within 24-72 hours.

Because of this win/win, in our first market NYC, one in five new patient-doctor relationships is established via Zocdoc.

Our other markets are following the same trajectory.

Oliver Kharraz M.D. – CEO / Founder, Zocdoc, 6/19

Zocdoc = Digital Healthcare Marketplace

On-Demand Urgent Care = Reducing Time to Receive Treatment

**On-Demand Access =
Combining Convenience + Speed**

*No longer are patients okay with waiting
as many as 24 days to see a doctor.*

*Solv is putting patients in front of a
provider who can treat their
symptoms in as little as 15 minutes.
The benefit this provides
consumers is real.*

*We've already given ~20 years back to
consumers who typically spend 2 hours
between booking an appointment & getting
their issue resolved.*

Heather Fernandez – CEO / Co-Founder, Solv, 6/19

**Solv =
Convenient Care Marketplace**

Telehealth / Telemedicine = Strengthening Patient <> Practitioner Relationships

Telehealth Systems = Increasing Hospital Implementation

Teladoc = Remote Medical Care

Prescription Delivery = Improving Convenience + Affordability

Prescription Drug Expenditures = Rapidly Rising

Nurx = On-Demand Drug Delivery

Communication / Professional Community = Extending Knowledge Base to Practitioners

Communication = Increasing Ability to Address Unique Cases

[A patient] was bitten by a Macaque monkey & as a result, came down with a rare form of encephalitis. A potentially fatal brain inflammation. His physician used Doximity to find one of the rare specialist who could treat this condition.

There are only about 20 doctors in the entire U.S. that are expert in this area. The patient was referred & treated successfully.

Most people don't realize that referring patients to the appropriate specialist isn't always easy for physicians & our network makes that process seamless, even in the toughest cases.

Jeff Tangney – CEO / Co-Founder, Doximity, 12/17

Doximity = Physician Social Network

Health Insurance Management = Simplifying + Centralizing User Experience

Modernized Management = Re-Imagining Legacy Systems

We have our own claims system we've been building, we have our own clinical management system, we built our networks ourselves – pretty much everything that we do internally to manage people's healthcare was reinvented & rebuilt from a technology perspective & so that's what we can now go faster toward.

We can hire more engineers, we can hire more data scientists, more product designers, more smart clinicians who can think about health care a different way.

Mario Schlosser – CEO / Co-Founder, Oscar Health, 8/18

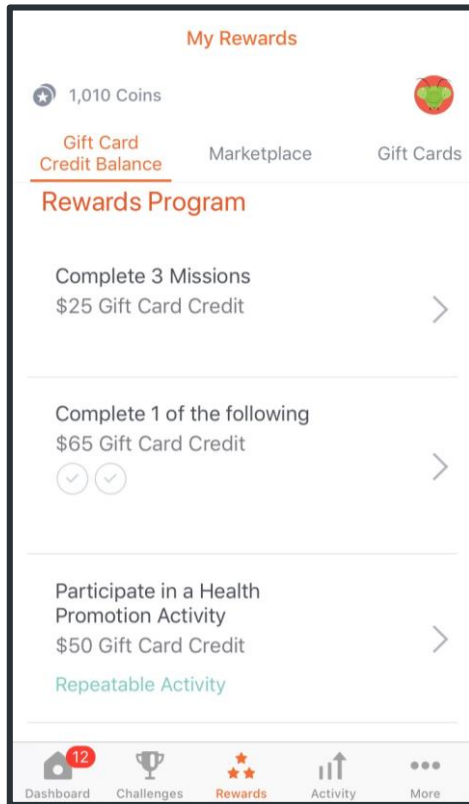

Oscar = Digital Health Management

Oscar Memberships, USA

Health Incentive Tools = Driving Positive Choices via Savings + Personalized Rewards

Rewards = Building + Reinforcing Positive Habits

Rally Health = Incentivizing Healthy Living

Medicare Plan Management = Personalizing Coverage + Costs

Medicare Advantage Enrollments = On the Rise

Clover Health = Matching Plans with Members' Needs

Source: Kaiser Family Foundation analysis of CMS Medicare Advantage enrollment files (2008-2018) & MPR numbers (1999-2007) from March of the respective year, with the exception of 2006, which is from April (11/18). Clover Health (3/19). Note: Enrollment includes cost plans & Medicare Advantage Plans. Approximately 61MM people are enrolled in Medicare in 2018.

***Healthcare Innovation =
Internet Leaders Building Capabilities***

Healthcare Innovation = Internet Leaders Poised to Capture Data

Internet Leaders = Increasingly Trusted with Healthcare Data

*With which tech company would you share your health data?**

Source: Rock Health Digital Health Consumer Adoption Survey, 2018; n = 4,000. *Note this question was only asked to the 11% of total respondents that answered 'yes' to the question asking whether they'd be willing to share their health data with a tech company.

Healthcare Innovation = Apple... Hardware + App Store Leveraging Research For Consumers

Apple = Democratization of Healthcare

If you zoom out into the future & you look back, & you ask the question, 'What was Apple's greatest contribution to mankind,' it will be about health.

Because our business has always been about enriching people's lives. We've gotten into healthcare more & more through the Watch, other features created with ResearchKit & CareKit & including medical records on the iPhone. This a huge deal.

[Healthcare] is very important for people. We are democratizing it. We are taking what has been with the institution & empowering the individual to manage their health. We're just at the front end of this.

Tim Cook – CEO, Apple, 1/19

Apple ResearchKit = Medical Research Technology for Consumers

Healthcare Innovation = Google / Alphabet... Artificial Intelligence Unlocking Insights for Practitioners

Google = AI Enabled Healthcare

If AI can shape healthcare, it has to work through the regulations of healthcare. In fact I see that as one of the biggest areas where the benefits will play out for the next 10-20 years.

We had recently done work on diabetic retinopathy, it's a cause for blindness, but using AI machine learning we can detect it much better than humans can.

Sundar Pichai – CEO, Google, 10/17

DeepMind Streams = AI Assistant for Doctors + Nurses

Healthcare Innovation = Microsoft Healthcare... Enabling Healthcare's Move to the Cloud with AI Solutions

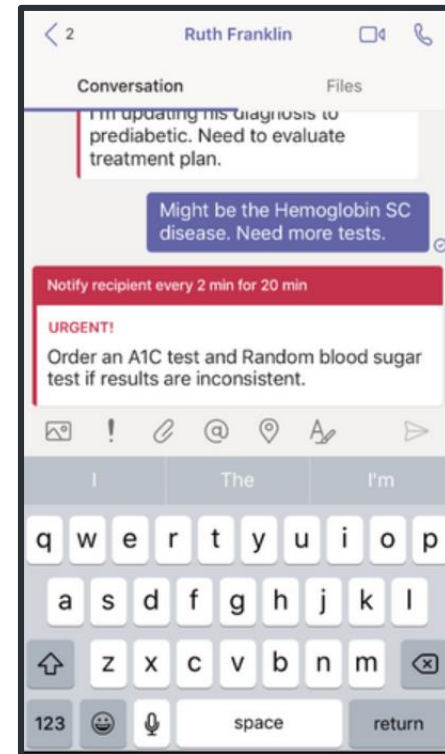

Microsoft = Intelligent Healthcare

The healthcare industry has made great strides over the last decade in helping digitize healthcare & so the next ten will be about turning those assets into better health insights, experiences & outcomes. This is where we can make a big contribution. Cloud, AI & research capabilities will play a fundamental role towards the future. At Microsoft, we're continuing to learn & grow every day from the extensive set of partnerships that we have had in healthcare: over 168,000 healthcare organizations in 140 countries.

Health & wellbeing are central to our daily lives. New inventions developed with our partners using Microsoft AI & machine learning can create a better future & make healthcare delivery more personal, affordable & accessible.

Peter Lee – CVP, Microsoft Healthcare, 4/19

Microsoft Health Bot = Troubleshooting Health Issues

Healthcare Innovation = Amazon / PillPack... Consumer-Centric Approach to Medication Management

PillPack = Consumable Healthcare

*PillPack is meaningfully improving its customers' lives & we want to help them continue making it easy for people to **save time, simplify their lives, & feel healthier.** We're excited to see what we can do together on behalf of customers over time.*

Jeff Wilke – CEO, Amazon Worldwide Consumer, 7/18

Prescription Medicine Usage = Increasingly Common

Prescription Medicine Usage, 2019, USA

Source: Kaiser Family Foundation Health Tracking Poll (2/19). Survey of 1,400 USA adults over the age of 18, including 606 over the age of 65, conducted from 2/14-2/19/19. Respondents were asked the question: 'Do you currently take any prescription medicine or not? IF YES: How many different prescription drugs do you take?'. PillPack press release (7/18).

Healthcare Cost = High + Rising for Government / Consumers

Health Expenditures % of Government Total, USA

Health Expenditures, % of GDP, 2017, per OECD

Source: USA Federal + State & Local Healthcare expenditures per the Center for Medicare / Medicaid Studies. Total USA Government expenditures per USA Bureau of Economic Analysis Data. Total Health expenditure per OECD data includes all public / private healthcare spend for the year 2017 (some data subject to future revision per OECD).
